12 Questions and answers

The screenshots in this manual were taken from the real JualanLab with a sample shop, Dapur Mak Long, and prices from UntungLab. The red numbers on a picture match the numbers in the caption below it. Your own figures will differ, because they come from your own prices and sales.

1 Getting to know JualanLab

A sales counter and online store for small sellers that knows the profit on every item.

JualanLab is a sales counter (POS) app on your phone. You sell at the counter, at a bazaar or through your own online store. Every sale is recorded with its **real profit**, because the price and margin of each item come straight from UntungLab.

At the end of the day, Close Day counts the cash in the drawer and splits the money into **capital to buy ingredients again** and **your profit**, so capital does not get spent without you noticing.

UntungLab and JualanLab

You do not need UntungLab. Without it, you add items and prices yourself, but the profit on those items is unknown because their cost is not known.

Plans

Plan	What you get
Free month	Every new shop gets every feature for its first 30 days, the online store included. No card, no automatic charge.
Free	The counter with up to 10 active items, Open and Close Day, Bazaar Mode, receipts. No UntungLab link, no Laporan, no online store.
Full POS	Paid once. Unlimited items, the UntungLab link, Laporan.
Kedai Online	A subscription, RM19.90 a month or RM199 a year, for full POS owners. Your own online store with its own link and QR.

Where your data is kept

Sales are kept on the phone first, then sent to the JualanLab server when there is internet. Every shop phone signed in with the same account shares the catalogue, the business day and the reports. UntungLab recipes and ingredient costs stay on your phone and are never sent.

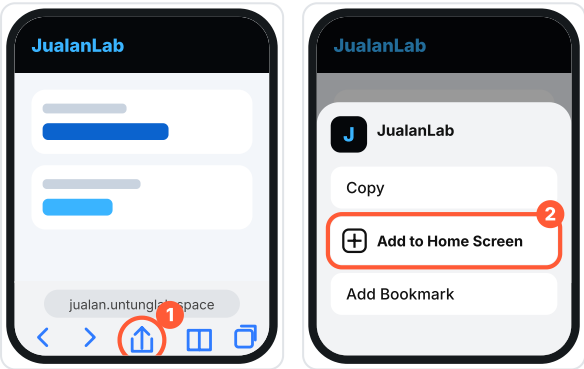

2 Install and sign in

Add JualanLab to your home screen, sign in with your smeLab account and name your shop.

1. Add it to your home screen

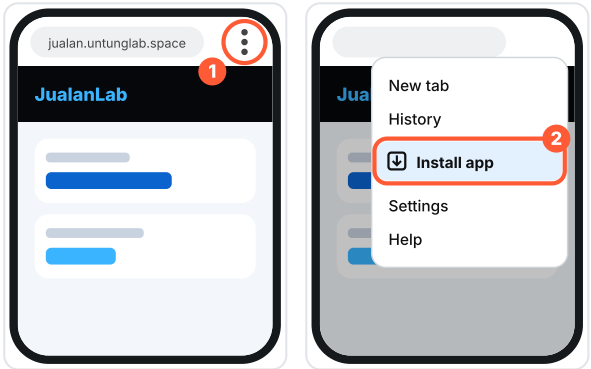

JualanLab is a web app, so there is no Play Store or App Store. Open **jualan.untunglab.space** and add it to your home screen once. After that it opens like a normal app, full screen. **Install and open it once while you have internet** so the counter opens without internet afterwards.

iPhone / iPad (Safari)

1. Open **jualan.untunglab.space** in **Safari**. Other browsers on iPhone cannot install apps.
2. Tap the **Share** button (a box with an arrow pointing up) at the bottom of the screen.
3. Scroll and tap **Add to Home Screen**.
4. Tap **Add**. The JualanLab icon appears on your screen. Open JualanLab from that icon, not from Safari.

Android (Chrome)

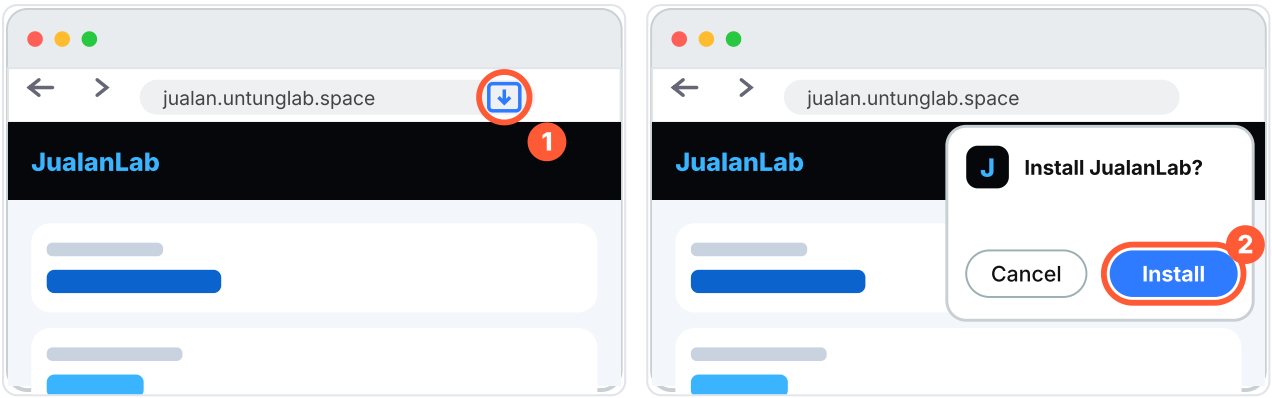

1. Open **jualan.untunglab.space** in **Chrome**.
2. Tap the ⋮ menu (three dots) at the top corner.
3. Choose **Install app** or **Add to Home screen**.
4. Tap **Install**. The JualanLab icon appears on your screen.

AN "UNSAFE APP" WARNING?

This is a normal Android or Google Play Protect warning for apps installed from the web. Tap **More details**, then **Install anyway**. If you are unsure, just use JualanLab in Chrome without installing it.

Computer or tablet (Chrome or Edge)

1. Open **jualan.untunglab.space** in Chrome or Edge.
2. Look for the **Install** icon at the end of the address bar, or open the ⋮ menu and choose **Install JualanLab**.
3. Click **Install**. JualanLab opens in its own window, handy for a shop counter.

> **TIP**
> More than one phone in the shop? Install JualanLab on each phone and sign in with the same email. All of them share the catalogue, the business day and the orders.

2. Sign in with your smeLab account

JualanLab uses your smeLab account: one email for UntungLab, JualanLab and the other smeLab apps. There is no password.

1. Type your email and tap **Send 6-digit code**.
2. Open the email from smeLab. Not in your Inbox? Check **Spam** or **Promotions**.
3. Type the 6-digit code. You stay signed in on that phone, so you rarely need to do this again.

The first time, give your shop a name. It appears on receipts and on the online store, and you can change it later under **More → Shop settings**.

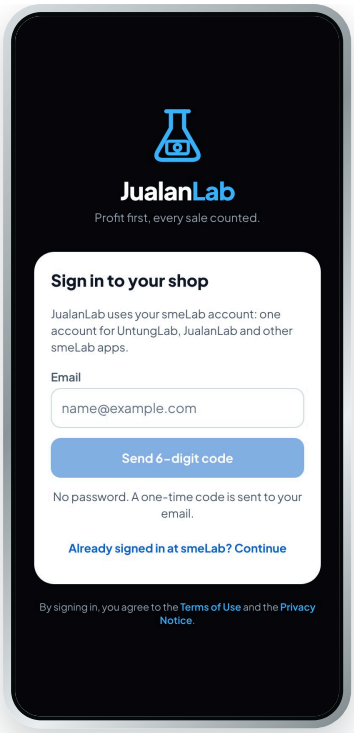

Figure 1. Sign in with your email.

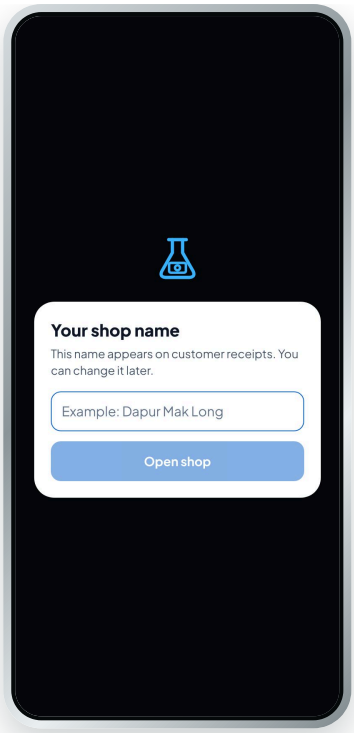

Figure 2. Name your shop.

3. Moving around the app

The bottom bar has **Home**, **Counter**, **Orders** (once you have an online store), **Sales** and **More**. Under **More** are Laporan, the online store, Catalogue, Discounts & Promotions, Bazaar Mode, Receive prices from UntungLab, Shop settings, Plans, the Manual and the language.

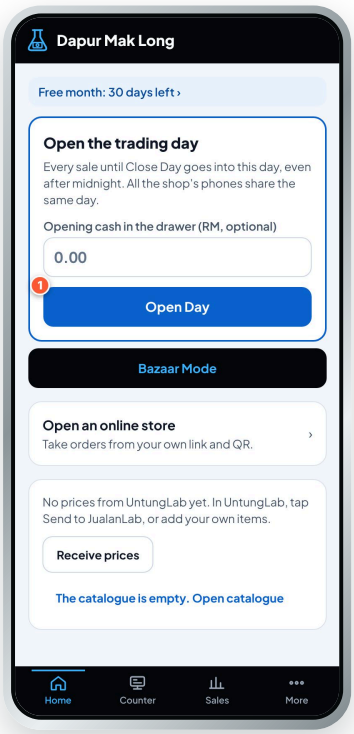

Figure 3. Home before the day is opened.

1 Open Day to start selling.

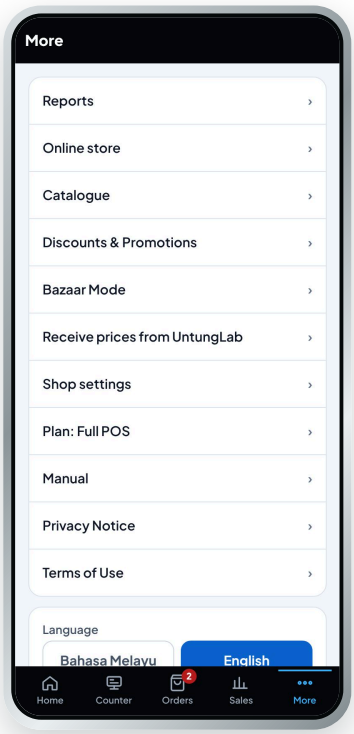

Figure 4. The More menu.

3 Prices from UntungLab and the Catalogue

Bring your menu in with one tap from UntungLab, or add items yourself.

Send to JualanLab

1. In **UntungLab**, open **Menu** (or **More**) and tap **Send to JualanLab**.
2. Tap the open button. JualanLab opens with your price list.
3. Check the list: **New**, **Changed** and items that are the same. Tap **Accept**.

UntungLab on another phone? Copy the link in UntungLab and paste it under **More → Receive prices from UntungLab**, or open the shared .json file.

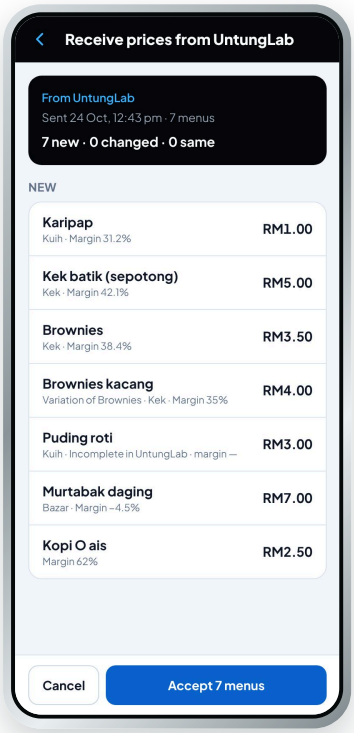

Figure 5. The preview before you accept.

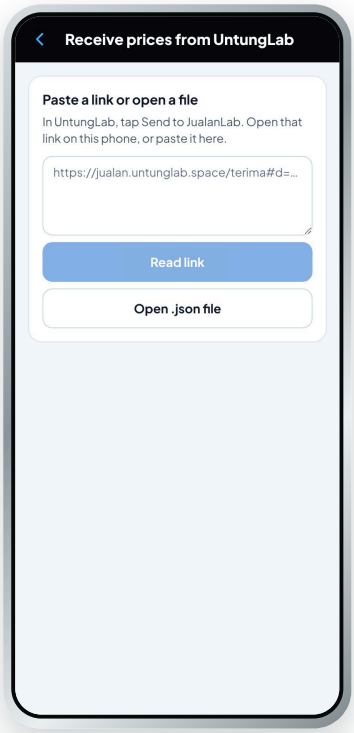

Figure 6. Paste a link or open a file.

> **WARNING**
> Send again every time you change a cost, price or margin in UntungLab. JualanLab does not know about the change until you send it, because UntungLab data stays on your phone.

When you send again	What happens
A price or margin changed	The item is updated. Past sales keep the cost and margin of the day they were made.
You set your own counter price	Your price is kept and marked **Own price**.
A menu was removed in UntungLab	The item becomes inactive, not deleted, because past sales refer to it.

Catalogue

The catalogue is every item you can sell. Items from UntungLab carry a margin. Tap **Add item** for things that are not in UntungLab, such as drinks. You can make an item inactive when you stop selling it; it does not disappear from past sales.

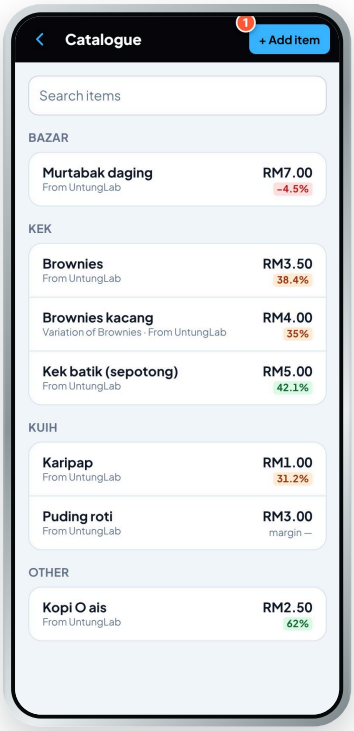

Figure 7. The catalogue with items from UntungLab.

1 Add your own item.

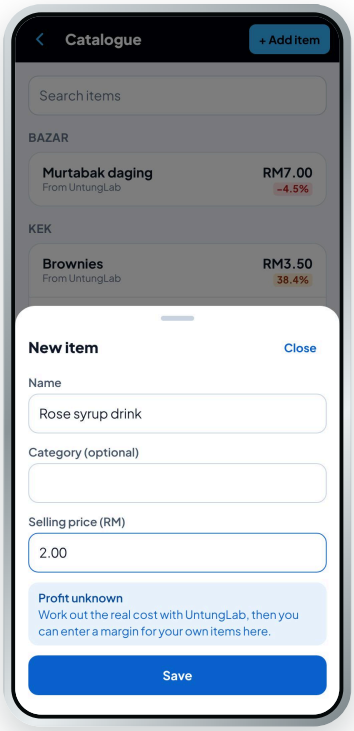

Figure 8. A new item.

REMEMBER

Your own items have no cost, so their profit is "unknown". UntungLab owners may type a margin (%) for their own items. The Free plan allows 10 active items.

4 Open Day and sell at the counter

One business day, from Open Day to Close Day, even past midnight.

Open Day

On **Home**, type the starting cash in the drawer (optional) and tap **Open Day**. Every sale until you Close Day belongs to this day, even if your stall stays open past midnight. The other shop phones follow the same day.

Sell

1. Open **Counter**. Tap an item to add one; tap again to add more. The **–** button takes one away.
2. Filter by category or search by name. Each item shows its price and margin (red when it loses money).
3. Tap **Pay**.

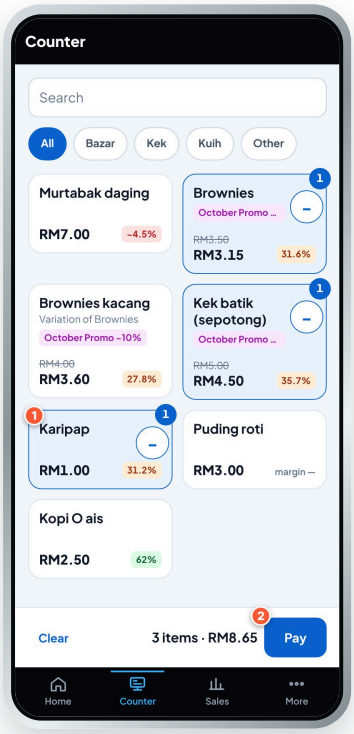

Figure 9. The counter with three items in the basket.

1. An item in the basket, with its count.
2. Pay.

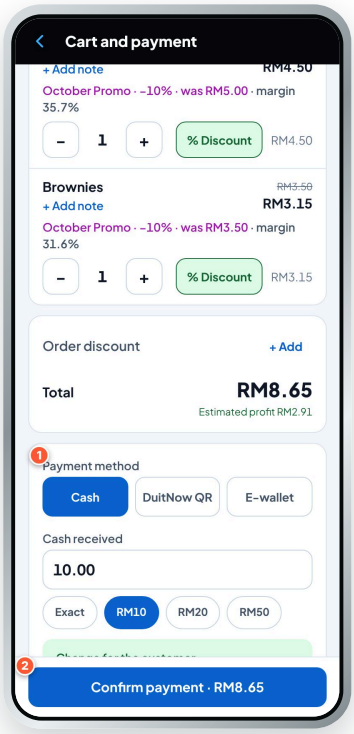

Figure 10. Basket and payment.

1. Choose how they pay.
2. Confirm the payment.

Payment

Method	What to do
Cash	Tap the amount received (Exact, RM10, RM20, RM50) or type it. The change to give back appears straight away.
QR DuitNow	Tap **Show shop QR** so the customer can scan. Check your bank notification, then confirm.
E-wallet	Like QR: confirm once the money is in.

In the basket you can add a note to an item, give one item a **% Discount** (5, 10 or 15% buttons), or discount the whole order. The new margin is worked out on the spot, so you see if a discount makes you lose money. Running promotions are taken off by themselves.

Receipt

Once confirmed, the receipt appears. Save or share the **receipt picture** to WhatsApp, or type the customer's number and send a text receipt. Tap **New sale** for the next customer.

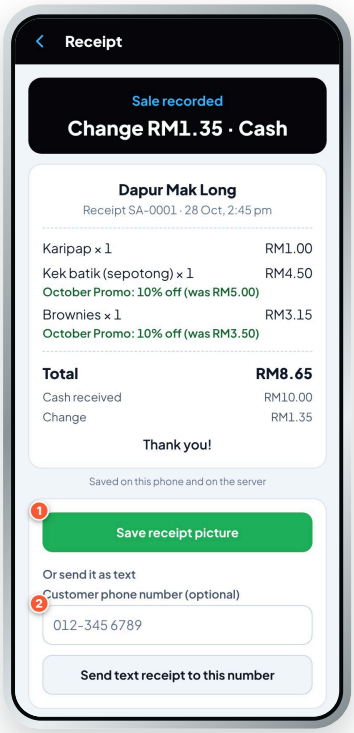

Figure 11. The receipt after a cash payment.

1. Save or share the receipt picture.
2. Or send a text receipt to the customer's number.

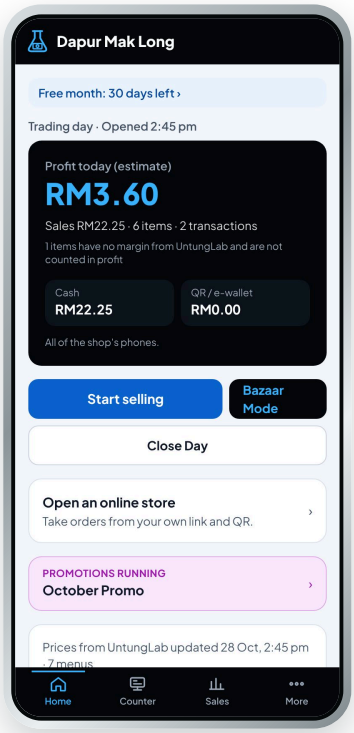

Figure 12. Home while the day is open: today's profit.

> **TIP**
> No internet? Keep selling. Sales are kept on the phone and sent by themselves when the connection is back. In **Sales**, sales not sent yet are marked **Not sent**.

5 Sales and Close Day

See today's sales, void a wrong sale, and close the day with money envelopes.

Today's sales

Sales shows total sales, estimated profit and the number of transactions, a split by payment method, best sellers, promotions used, and a list of every transaction. The arrow buttons change the day. **Export CSV** downloads the sales for Excel or Google Sheets.

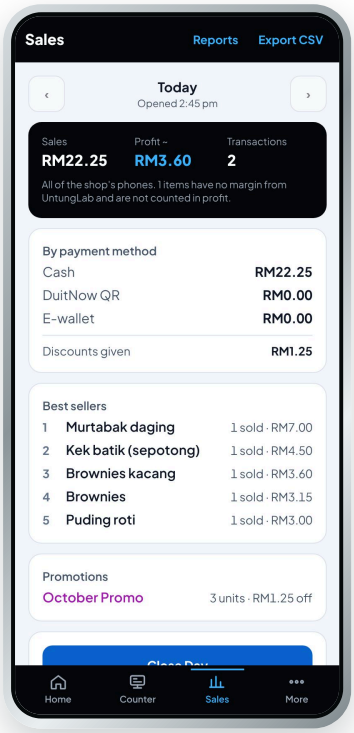

Figure 13. Today's sales.

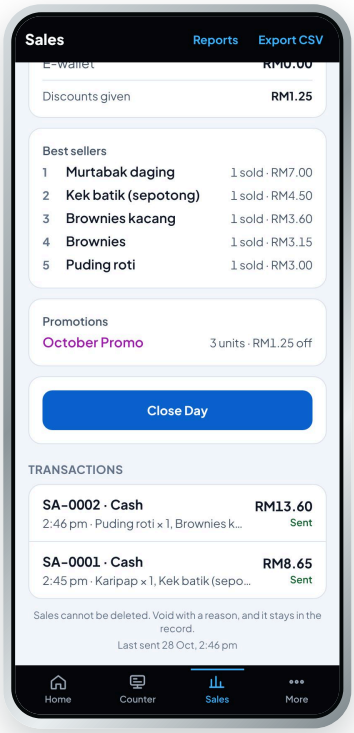

Figure 14. Best sellers, promotions and transactions.

> **REMEMBER**
> Sales cannot be deleted. A mistake? Open that transaction and **Void** it with a reason. It stays in the record but is not counted, and online store stock comes back if you void it the same day.

Close Day

1. Tap **Close Day** on Home or Sales.
2. **Count the cash in the drawer** and type the total. JualanLab shows the expected cash (starting cash + cash sales) and whether you are over or short.
3. Look at **Money envelopes**: how much to keep as **capital to buy ingredients again** and how much is your **profit**.
4. Tap **Close Day**. The day closes for every phone. Sales after that need a new Open Day.

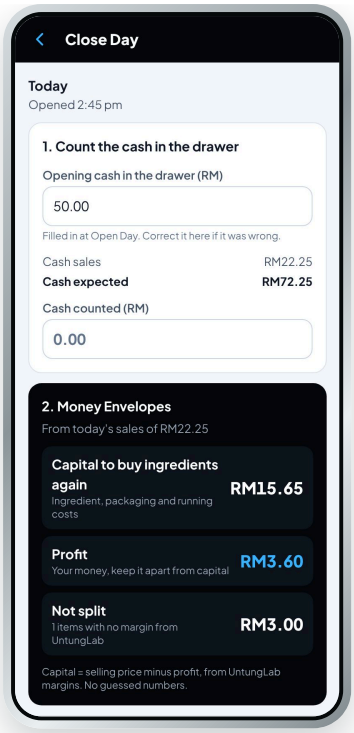

Figure 15. Count the cash in the drawer.

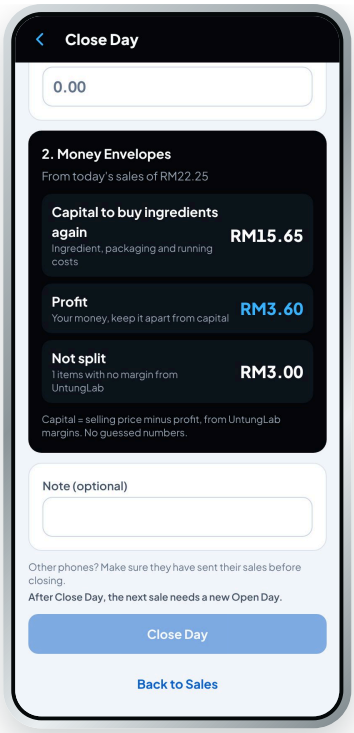

Figure 16. Money envelopes.

> **TIP**
> Keep two envelopes or two bank accounts: one for capital, one for profit. Put in the amounts JualanLab shows each day, and your capital will not get spent.

Not split is sales of items without a margin from UntungLab: JualanLab cannot tell how much is capital and how much is profit. Send those items from UntungLab so they are counted.

6 Bazaar Mode

Big buttons for Ramadan bazaars, night markets and fairs.

At a bazaar, customers queue and you need to be fast. Bazaar Mode shows up to 8 big buttons, one per item, and big payment buttons. The screen stays on and buttons make a sound when pressed. It works without internet.

1. Open **Bazaar Mode** from Home or More.
2. Pick the items for the big buttons (up to 8).
3. If the day is not open yet, type the starting cash and tap **Open Day & start bazaar**. If it is, tap **Start bazaar**.
4. Tap items, then **Exact**, a cash amount, or **QR**. The change shows in large type. Tap **Done · next customer**.

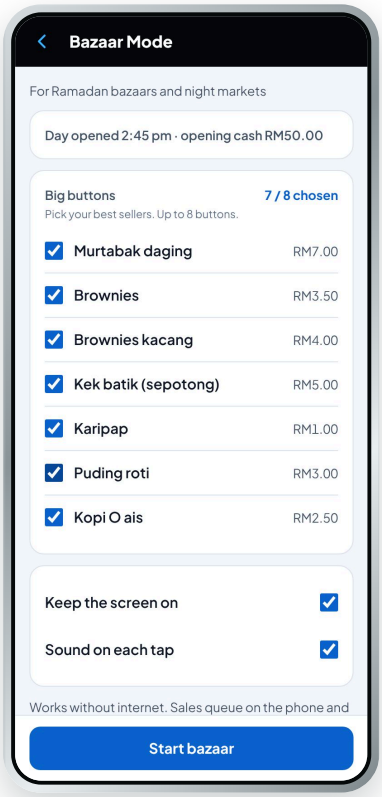

Figure 17. Setting up Bazaar Mode.

REMEMBER

Bazaar sales go into the same business day and are marked **Bazaar** in Sales and Laporan. Close Day as usual when you finish.

7 Discounts and Promotions

Promotions come off by themselves at the counter, the bazaar and the online store.

Under **More → Discounts & Promotions**, tap **+ Promotion**. Give it a name (it appears on receipts), choose a **percentage** or a **promo price**, choose all items, categories or chosen items, and start and end dates. JualanLab shows the items affected and their new margin, including any that lose money.

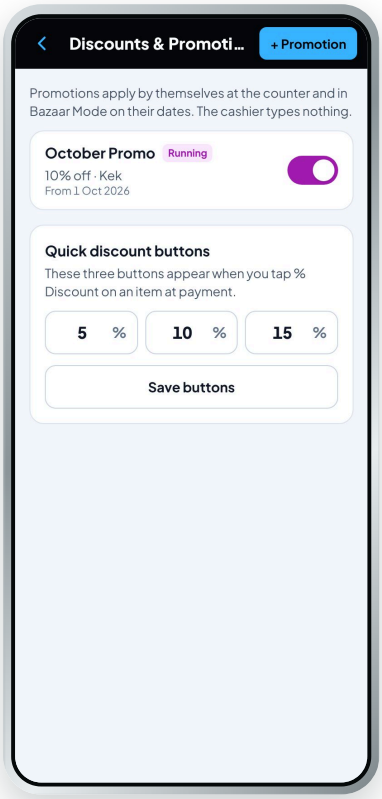

Figure 18. A running promotion and the quick discount buttons.

The **quick discount buttons** are the percentages shown in the basket to discount one item at payment. Change them to the values you usually give.

8 The online store

Your own store with its own link and QR. Customers order from their phone and pay with your DuitNow QR.

Set up the store

1. Open **More → Online store** and tap **Set up store**.
2. Choose your **store link**, for example kedai.untunglab.space/dapur-mak-long.
3. Add a logo, a cover photo, a brand colour and a short line.
4. Set how customers get their order, payment, your **shop DuitNow QR** and WhatsApp number.
5. Turn on **Publish store** and tap **Save**.

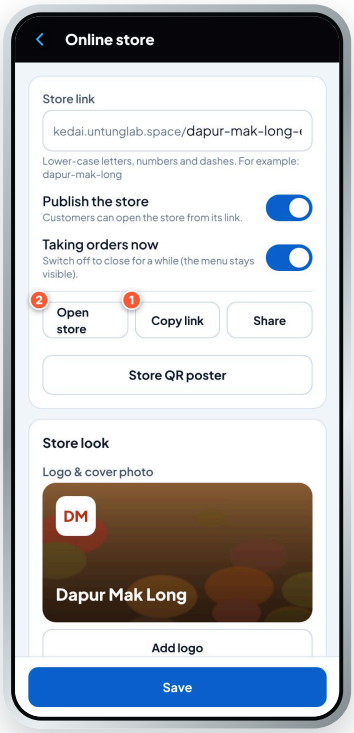

Figure 19. The store link and look.

1. Copy the link to share.
2. Open the store to see it as a customer does.

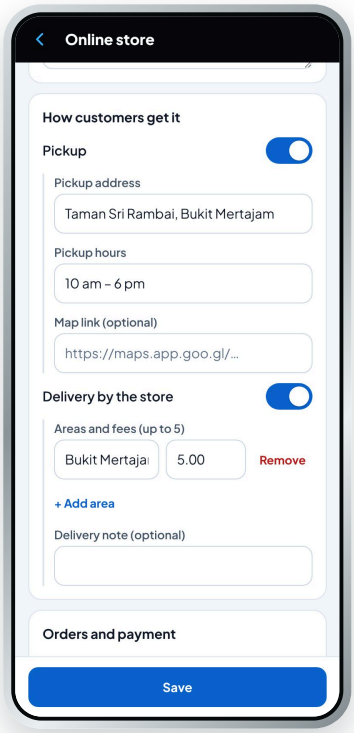

Figure 20. Pickup and delivery.

TIP

Take orders now can be turned off when you are away or sold out. Customers still see the menu but cannot order.

How you take orders

Mode	Suits
Normal	Orders for now, while the store is open.
Opening hours + automatic pre-order	Set your opening hours for each day and your holidays. Outside opening hours, orders become pre-orders for the next opening day, and the store shows your opening hours. 30 minutes before closing, JualanLab reminds you to check tomorrow's stock.
Pre-order batches	For cakes, festive cookies or weekly menus: make batches with a ready date, an order closing date, an order limit and their own menu and stock.

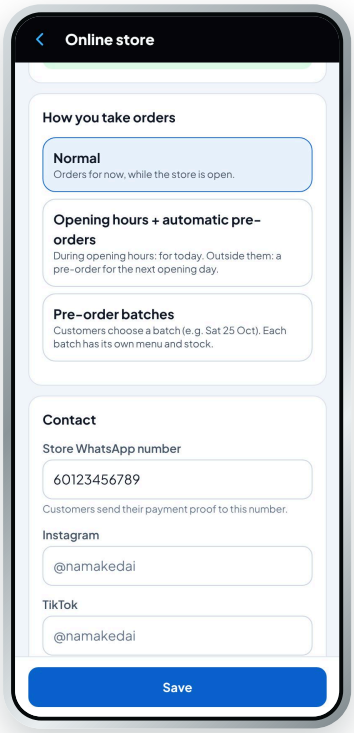

Figure 21. How you take orders.

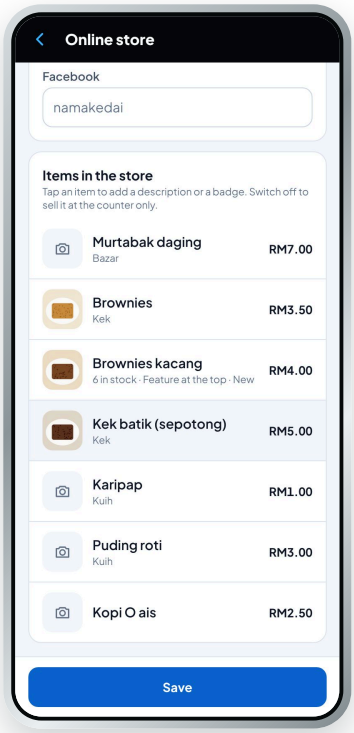

Figure 22. Store items: photos, stock and badges.

Items and stock

Under **Store items**, tap an item to add a photo and description, a badge (New, Spicy, Best seller), feature it at the top, or hide it from the store (counter only). Turn on **Track stock** for limited items: the store shows "Only 3 left", and at 0 the item is marked **Sold out**. Counter and bazaar sales take from store stock too.

What customers see

1. The customer opens the link or scans the store QR, picks items and taps **View cart**.
2. They choose pickup or delivery and fill in their name and WhatsApp number. Their details are kept on their phone for next time.
3. After placing the order, they scan your DuitNow QR and tap **Paid? Send proof**, which opens WhatsApp to you with the order number.

4 Their order page updates by itself when you change the status.

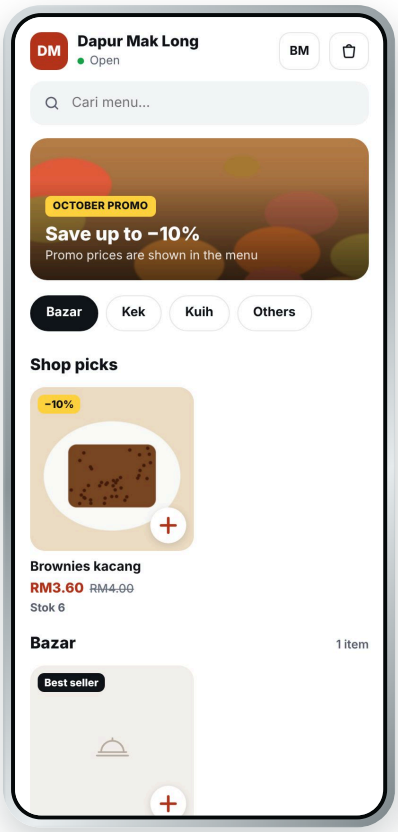

Figure 23. The online store on a customer's phone.

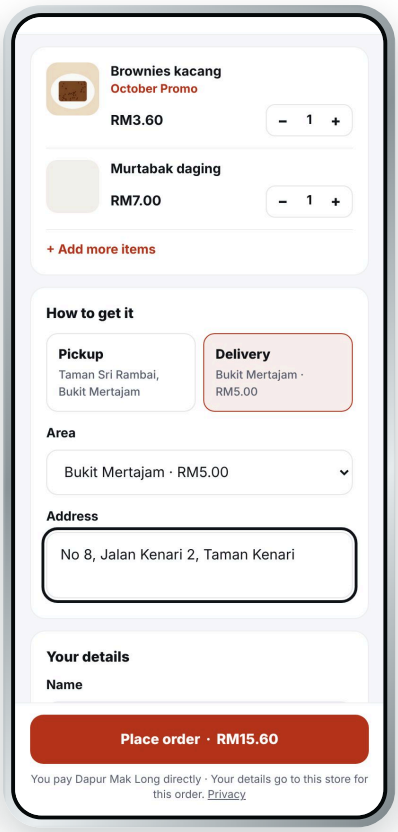

Figure 24. Cart: how to get it and details.

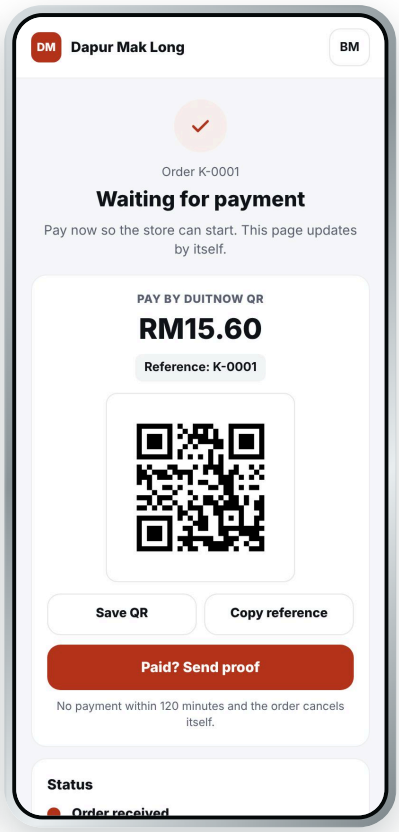

Figure 25. Pay with DuitNow QR.

> **REMEMBER**
> Payments go straight into your account. JualanLab never holds customers' money. QR orders that are not paid cancel themselves after the time you set, and their stock comes back.

Share your store

Tap **Copy link** or **Share** to send it to WhatsApp, Instagram or Facebook. The **store QR poster** is ready to print (A4) and stick on your stall, counter or cake boxes.

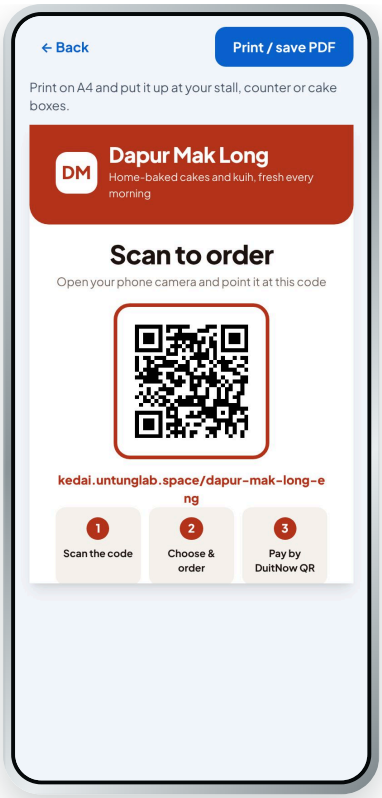

Figure 26. The store QR poster.

9 Orders

Take, prepare and hand over online orders, one button per step.

A new order

A new order plays a sound and shows a banner while the app is open. Turn on **New order notifications** in the Orders tab to be notified even when the app is closed. On iPhone, notifications only work when JualanLab is installed on the Home Screen.

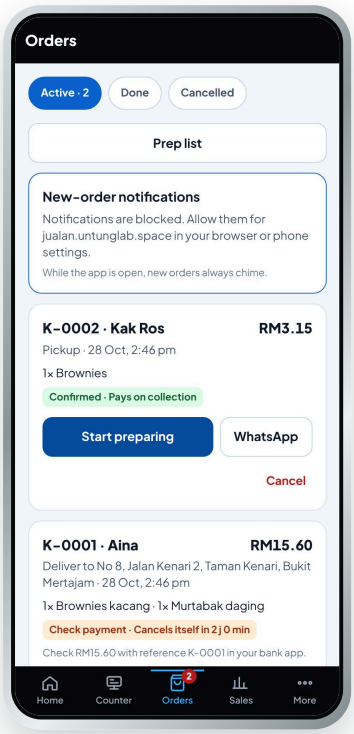

Figure 27. The Orders tab.

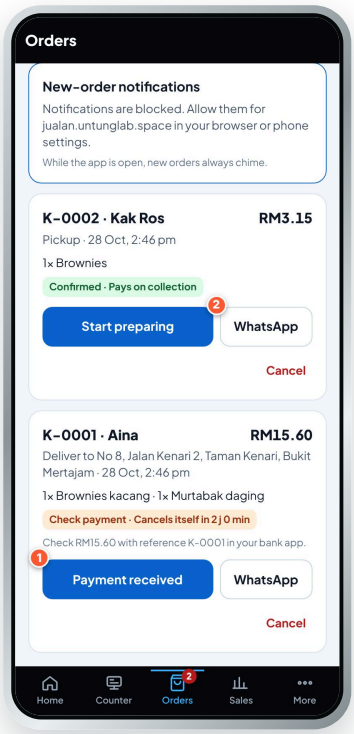

Figure 28. Order cards.

1. The next step.
2. WhatsApp the customer with a ready message.

Order steps

Status	What you do
Check payment	Check the amount and the order number reference in your bank app, then tap **Payment received**. The order becomes a sale in your business day.
Confirmed	Tap **Start preparing**.
Preparing	Tap **Ready for pickup** or **Out for delivery**.
Ready	Tap **Done** when the customer has it. Pay on collection: choose Cash or QR.

Every step has a **WhatsApp** button with a ready message for the customer. Need to cancel? Tap **Cancel** and give a reason; a paid order has its sale voided and you refund the customer yourself.

Book a rider

For delivery orders, **Book a rider** copies everything Lalamove or Grab ask for: pickup address, customer name and number, delivery address, order number, and the amount to collect for pay on collection. Tap **Copy details**, open Lalamove or Grab, and paste. You pay the rider fare to them directly.

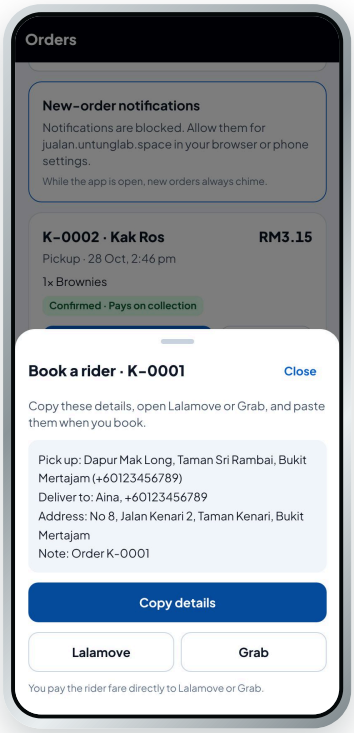

Figure 29. Book a rider.

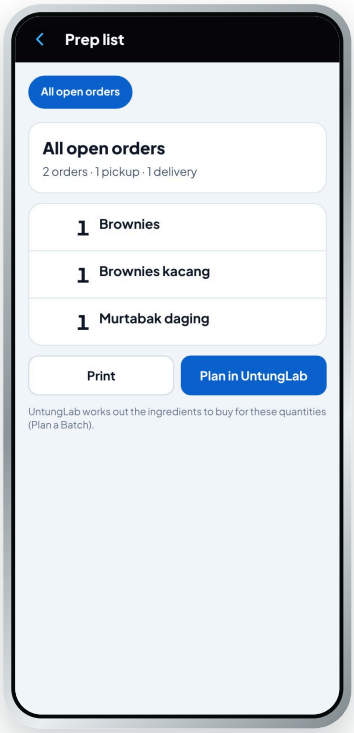

Figure 30. Prep list: what to make.

Prep list

The **prep list** adds all active orders (or one batch) into how many of each item to make. Print it, or tap **Plan in UntungLab** to work out the ingredients to buy.

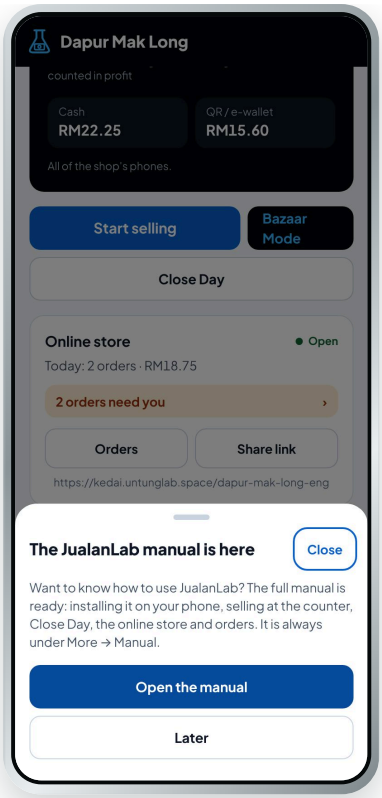

Figure 31. The online store card on Home: today's orders and orders that need you.

10 Laporan (reports)

Profit, sales and your best items for any period.

Open **More → Laporan**, or Laporan from Sales. Choose Today, 7 days, This month, Last month or your own dates. Every figure is compared with the period before.

- **Gross profit** and sales, margin, transactions and average basket.
- **Daily sales** and the busiest day.
- **Items by profit**, including items that lose money and a price suggestion.
- **Sales channels** (counter, bazaar, online) and **payment methods**.

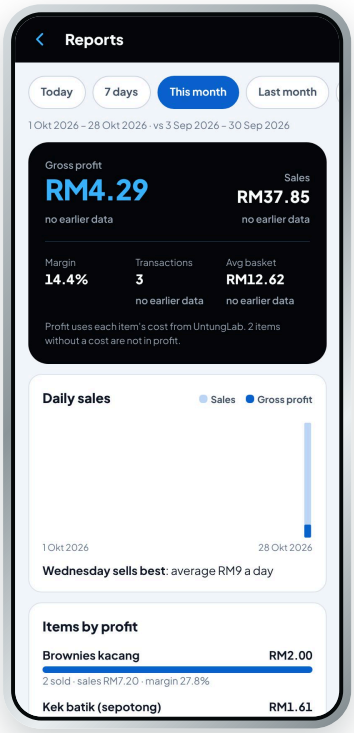

Figure 32. This month's Laporan.

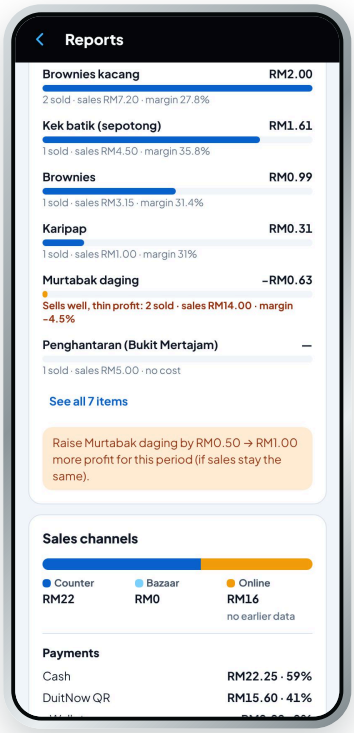

Figure 33. Items by profit and sales channels.

REMEMBER

Laporan is part of the full POS (and the free month). Profit comes from the UntungLab margin on the day each item was sold.

11 Plans and buying

Pay once for the full POS; Kedai Online as a subscription.

More → Plans shows your plan, the free days left, and your Kedai Online status. You buy at **smelab.untunglab.space** with the same email, through FPX (ToyyibPay).

1. Tap **Buy at smeLab**.
2. Sign in with the same email as JualanLab, choose JualanLab and pay.
3. Come back to JualanLab and tap **Paid already? Check again**. The full POS opens at once.

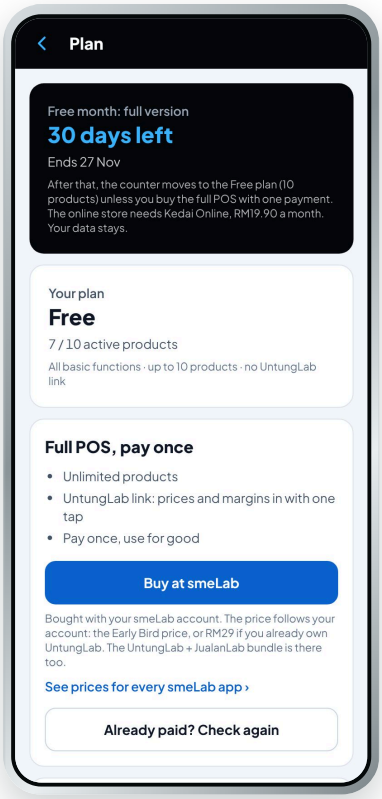

Figure 34. Your plan.

Price	
Full POS	RM49, paid once. An Early Bird price for the first buyers. RM29 if you already own UntungLab. UntungLab + JualanLab bundle RM75.
Kedai Online	RM19.90 a month or RM199 a year, no automatic charge. Subscribing opens in the app before the first free months end. Coming to Kedai Online: online payment through a payment gateway, and delivery (Lalamove, EasyParcel).

REMEMBER

After the free month, a shop without the full POS moves to Free: the counter with 10 items, no online store. No data is deleted, and everything reopens as soon as you upgrade. Full refund within 7 days: email admin@digitalsambal.space.

12 Questions and answers

Quick answers when something is not as expected.

The app says "offline" even though I have internet.

Close the app fully and open it again. Still the same? Open jualan.untunglab.space in Chrome or Safari: if that page does not open either, the problem is the phone's connection or DNS. Switch to mobile data, or turn off Private DNS in the phone settings. Your sales are safe on the phone. **Do not clear the app's data** while there are unsent sales.

Two phones sell at the same time. Do they clash?

No. Each phone has its own receipt numbers, and all sales go into the same business day.

I changed phones.

Install JualanLab on the new phone and sign in with the same email. Your catalogue, sales and store are on the server. Make sure the old phone has sent all its sales first.

Profit shows "?" for some items.

That item has no margin: it is your own item, or not complete in UntungLab. Complete its cost in UntungLab and send again.

A customer ordered but did not pay.

Unpaid QR orders cancel themselves after the time you set in the store settings, and the stock comes back. You can also cancel them yourself with a reason.

Order notifications do not appear on iPhone.

Add JualanLab to the Home Screen through Safari, open it from that icon, then turn on notifications in the Orders tab.

Need other help?

Email admin@digitalsambal.space. Tell us your account email and send a screenshot of the screen.

Happy selling with JualanLab!
