

JualanLab V1: project breakdown

Ten phases from link format to launch. POS and online store launch together. After each phase: report, then wait for Mamu's approval before the next one starts.

Shared [UntungLab](#) [JualanLab](#) [Store](#) [Commercial](#) [Launch](#)

Arrows show what each phase needs first. Size is relative effort (S, M, L), not a date. Phases 2 and 3 can run side by side once phase 1 is approved. Phase 10 needs every phase signed off.

Working rules

One cost engine	Costs and margins are calculated only in UntungLab. JualanLab never recalculates them.
Two-way by tap	Prices and margins go out, batch quantities come back. Every hand-off starts with a tap; no background sync.
No guessed numbers	A missing margin shows "—", never 0%. Negative numbers carry a sign and a label.
Nothing deleted silently	Sales are voided with a reason, never deleted. Plan limits block adding only.
Tests and decisions first	Tests come with every phase. Every choice is logged in DECISIONS.md.

All phases at a glance

#	Phase	Stream	Goal	Needs	Size	Exit gate
1	Link format spec	Shared	Fix the two hand-off formats before anyone builds against them.	None	S	Spec and fixtures approved by Mamu
2	UntungLab: send and Plan a Batch	UntungLab	UntungLab can send prices out and take batch quantities in, still offline with no account.	1	M	Works on a real phone, all UntungLab tests pass
3	JualanLab foundation	JualanLab	A signed-in, bilingual JualanLab that can receive the UntungLab price list.	1	L	Sign in, import a real UntungLab list, see the catalogue
4	Counter POS	JualanLab	Sell at the counter end to end.	3	M	A full sale on a phone, receipt sent
5	Offline queue	JualanLab	Selling never stops when the signal drops.	4	M	Airplane-mode test passes on iPhone and Android
6	Sales Today and Lab features	JualanLab	The screen that makes JualanLab a Lab, not a cash register.	4, 2	M	Numbers match UntungLab margins on test data
7	Online store	Store	Customers order from the seller's own store page.	3, 6	L	A customer order arrives and appears in Sales Today
8	Kedai Plus	Store	Paid store tier with online payment on the seller's own account.	7	M	Real RM1 payment through a seller test account
9	Plans and licensing	Commercial	People can buy JualanLab, alone or with UntungLab.	3	M	Live RM1 purchase issues both rights correctly
10	QA and launch	Launch	Launch POS and store together.	All	M	Mamu signs off launch

Phase details

Phase 1 · Link format spec

Shared Size S · Needs None

Fix the two hand-off formats before anyone builds against them.

- Price list v1: UntungLab → JualanLab (id, name, category, price, margin, status, base menu)
- Batch list v1: JualanLab → UntungLab (menuId, quantity, batchDate)
- Header with app name, format number, time sent; data in the link # part
- Shared test fixtures used by both repos

Done when: Spec and fixtures approved by Mamu

Phase 2 · UntungLab: send and Plan a Batch

UntungLab Size M · Needs 1

UntungLab can send prices out and take batch quantities in, still offline with no account.

- Send to JualanLab: link, QR, JSON file fallback, "needs internet" notice
- Plan a Batch screen: shopping list and estimated cost from recipes
- Open a batch link from JualanLab; manual entry also works
- New DECISIONS.md entries; tests; no change to the cost engine or Price History

Done when: Works on a real phone, all UntungLab tests pass

Phase 3 · JualanLab foundation

JualanLab Size L · Needs 1

A signed-in, bilingual JualanLab that can receive the UntungLab price list.

- Repo setup, PWA, BM default and English, update banner (no auto reload)
- Cloudflare Worker + D1; Google sign-in and email OTP via Brevo
- Import price list with preview (new, changed, same); own items allowed
- Catalogue: categories, variations under base menu, inactive items kept

Done when: Sign in, import a real UntungLab list, see the catalogue

Phase 4 · Counter POS

JualanLab Size M · Needs 3

Sell at the counter end to end.

- Counter grid by category, search
- Cart: quantity, item notes, order discount (RM)
- Payment: cash with change, DuitNow QR, e-wallet, confirmed by hand
- Digital receipt shared to WhatsApp; sale saved on device first, then server

Done when: A full sale on a phone, receipt sent

Phase 5 · Offline queue

JualanLab Size M · Needs 4

Selling never stops when the signal drops.

- Sales queue on the device with unique ids (no double sales)
- Banner "Offline · n sales not sent", stronger after 24 hours
- What is blocked offline: import, Close Day, other devices, gateway payments
- Tests that cut the connection in the middle of a sale

Done when: Airplane-mode test passes on iPhone and Android

Phase 6 · Sales Today and Lab features

JualanLab Size M · Needs 4, 2

The screen that makes JualanLab a Lab, not a cash register.

- Profit Today: sales and estimated profit, items without margin named
- Close Day: cash expected vs counted; voids kept with a reason, never deleted
- Money Envelopes: capital to restock vs profit, after Close Day
- Prep List per batch + Send to UntungLab; CSV export

Done when: Numbers match UntungLab margins on test data

Phase 7 · Online store

Store Size L · Needs 3, 6

Customers order from the seller's own store page.

- Store page at the subdomain (/k/shop-name), sold-out switch, opening hours
- Batch Selling: order date, quota shared with the counter, auto close
- Checkout: name, phone, pickup or delivery (flat fee), date and time, notes
- Order inbox (New, Preparing, Ready, Done, Cancelled), email alerts, privacy notice

Done when: A customer order arrives and appears in Sales Today

Phase 8 · Kedai Plus

Store Size M · Needs 7

Paid store tier with online payment on the seller's own account.

- Seller ToyyibPay or Billplz keys stored encrypted on the server
- Every payment callback checked twice (as UntungLab D-64)
- RM19.90/month or RM199/year, prepaid, 14-day trial, renewal reminder
- When it lapses: store goes back to the Free level, data kept

Done when: Real RM1 payment through a seller test account

Phase 9 · Plans and licensing

Commercial Size M · Needs 3

People can buy JualanLab, alone or with UntungLab.

- POS RM49 one-time; early bird RM39 for the first 15; UntungLab users RM29
- Bundle RM75 for new users: new admin route on the UntungLab licence server issues a UL- code
- Free plan: 10 products, no UntungLab link, no online payment
- Limits block adding only; data is never deleted

Done when: Live RM1 purchase issues both rights correctly

Phase 10 · QA and launch

Launch Size M · Needs All

Launch POS and store together.

- Real-phone checklist on iPhone and Android
- Privacy policy and terms (PDPA, meaning of "lifetime")
- Sales page, production keys, early-bird slots set to 15
- Launch only when every phase above is signed off

Done when: Mamu signs off launch

After V1

When	Feature	What it does
V1.1	Price Test	Compare sales and profit before and after a price change from UntungLab.
V1.1	Menu Map	Each menu placed on popularity and profit, with one suggested action per group.
V1.1	Profit Target	Monthly profit goal with progress and "sell about 40 more" estimate.
V1.1, before Ramadan	Bazaar Mode	Big buttons, cash float and quick tally for bazaars and night markets.
Later, subscription	Ask the Lab (AI agent)	Questions in BM, captions for a batch, weekly summary. Paid add-on.

Prices locked on 9 Oct

Plan	Price	Includes
Free	RM0	10 products, counter and basic store page, pay at pickup or manual QR. No UntungLab link.
POS (one-time)	RM49 · early bird RM39 (first 15) · UntungLab users RM29	Unlimited products, UntungLab link both ways.
Bundle JualanLab + UntungLab	RM75 (new users)	Both apps; cheaper than buying them one after the other (RM78).
Kedai Plus (needs POS)	RM19.90/month or RM199/year · 14-day trial	Online payment via ToyyibPay or Billplz, delivery, unlimited store items.

Still open: the final domain (V1 uses a subdomain such as jualan.untunglab.space). Full reasoning for every decision: JualanLab V1 scope doc and research doc (links in JUALANLABDEV-NOTES.md).
