

JualanLab: project breakdown

Two releases. **V1** is the counter POS with Bazaar Mode, about 3 to 5 weeks after UntungLab launches. **V1.1** adds batches and the online store. After each phase: report, then wait for Mamu's approval.

Shared UntungLab JualanLab Store Commercial Launch Done

Boxes run in working order; the table on page 2 lists what each phase needs first. Size is relative effort (S, M, L), not a date. Phases 2 and 3 can run side by side; phase 2 starts once UntungLab is live and repo access is given.

Working rules

One cost engine	Costs and margins are calculated only in UntungLab. JualanLab never recalculates them.
Two-way by tap	Prices and margins go out, batch quantities come back. Every hand-off starts with a tap; no background sync.
No guessed numbers	A missing margin shows "—", never 0%. Negative numbers carry a sign and a label.
Nothing deleted silently	Sales are voided with a reason, never deleted. Plan limits block adding only.
Tests and decisions first	Tests come with every phase. Every choice is logged in DECISIONS.md.

All phases at a glance

#	Release	Phase	Stream	Goal	Needs	Size	Done when
1	V1	Link format	Shared	Fix the two hand-off formats before anyone builds against them.	None	Done	Done 9 Oct, waiting for Mamu's sign-off
2	V1	UntungLab: send + Plan a Batch	UntungLab	UntungLab can send prices out and plan a batch, still offline with no account.	1	M	Works on a real phone; all UntungLab tests pass
3	V1	JualanLab foundation	JualanLab	A signed-in, bilingual JualanLab that can receive the UntungLab price list.	1	L	Sign in, import a real UntungLab list, see the catalogue
4	V1	Counter POS	JualanLab	Sell at the counter end to end.	3	M	A full sale on a phone, receipt sent
5	V1	Offline queue	JualanLab	Selling never stops when the signal drops.	4	M	Airplane-mode test passes on iPhone and Android
6	V1	Sales Today + Lab features	JualanLab	The screens that make JualanLab a Lab, not a cash register.	4	M	Numbers match UntungLab margins on test data
7	V1	Bazaar Mode	JualanLab	A fast, dark counter for bazaars and night markets.	4, 5	S	A full bazaar session on a phone, offline, matches Close Day
8	V1	Plans and licensing	Commercial	People can buy JualanLab, alone or with UntungLab.	3	M	Live RM1 purchase issues the right rights
9	V1	QA and V1 launch	Launch	Launch the counter POS, about 1 to 15 Nov 2026.	1 to 8	M	Mamu signs off V1 launch
10	V1.1	Batch Selling + Prep List	JualanLab	Sell by batch with quotas, and plan what to cook.	6, 2	M	A batch sells out and its quantities arrive in UntungLab
11	V1.1	Online store	Store	Customers order from the seller's own store page.	3, 10	L	A customer order arrives and appears in Sales Today
12	V1.1	Kedai Plus	Store	Paid store tier with online payment on the seller's own account.	11	M	Real RM1 payment through a seller test account
13	V1.1	QA and V1.1 launch	Launch	Release the online store to existing and new users.	10 to 12	S	Mamu signs off V1.1 launch

Phase details

Phase 1 · Link format

Shared V1 · Size done · Needs None

Fix the two hand-off formats before anyone builds against them.

- Price list v1 (UntungLab to JualanLab) and batch list v1 (JualanLab to UntungLab)
- Envelope: raw DEFLATE + base64url in the link # part; QR up to 1,600 characters (about 22 menus)
- Reference codec in src/link, 52 tests
- Contract fixtures: 3 valid, 34 invalid cases, 2 real links

Done when: Done 9 Oct, waiting for Mamu's sign-off

Phase 2 · UntungLab: send + Plan a Batch

UntungLab V1 · Size M · Needs 1

UntungLab can send prices out and plan a batch, still offline with no account.

- Send to JualanLab: link, QR, JSON file fallback, "needs internet" notice
- Plan a Batch: type quantities, get the shopping list and cost from recipes
- Route /rancang-batch ready for the V1.1 batch link
- Copy src/link and pass the shared fixtures; no change to costs or Price History

Done when: Works on a real phone; all UntungLab tests pass

Phase 3 · JualanLab foundation

JualanLab V1 · Size L · Needs 1

A signed-in, bilingual JualanLab that can receive the UntungLab price list.

- PWA at jualan.untunglab.space, BM default and English, update banner
- Cloudflare Worker + D1; Google sign-in and email OTP via Brevo
- Import price list with preview (new, changed, same); own items allowed
- Catalogue: categories, variations, inactive items kept

Done when: Sign in, import a real UntungLab list, see the catalogue

Phase 4 · Counter POS

JualanLab V1 · Size M · Needs 3

Sell at the counter end to end.

- Counter grid by category, search
- Cart: quantity, item notes, order discount (RM)
- Payment: cash with change, DuitNow QR, e-wallet, confirmed by hand
- Digital receipt to WhatsApp; sale saved on the phone first, then the server

Done when: A full sale on a phone, receipt sent

Phase 5 · Offline queue

JualanLab V1 · Size M · Needs 4

Selling never stops when the signal drops.

- Sales queue on the phone with unique ids (no double sales)
- Banner "Offline: n sales not sent", stronger after 24 hours
- Blocked offline: import, Close Day, other devices
- Tests that cut the connection in the middle of a sale

Done when: Airplane-mode test passes on iPhone and Android

Phase 6 · Sales Today + Lab features

JualanLab V1 · Size M · Needs 4

The screens that make JualanLab a Lab, not a cash register.

- Profit Today: sales and estimated profit; items without margin named
- Close Day: cash expected vs counted; voids kept with a reason, never deleted
- Money Envelopes: capital to restock vs profit
- CSV export

Done when: Numbers match UntungLab margins on test data

Phase 7 · Bazaar Mode

JualanLab V1 · Size S · Needs 4, 5

A fast, dark counter for bazaars and night markets.

- Setup: cash float, pick 6 big buttons, screen always on, tap sound
- One-tap tiles with counts; Cukup, RM20, RM50 and QR buttons; change shown large
- Running total and cash in drawer; works offline through the queue
- Same sales records as the counter, so Sales Today and Close Day stay one story

Done when: A full bazaar session on a phone, offline, matches Close Day

Phase 8 · Plans and licensing

Commercial V1 · Size M · Needs 3

People can buy JualanLab, alone or with UntungLab.

- POS RM49 one-time; early bird RM39 for the first 15; UntungLab users RM29
- Bundle RM75 for new users: new admin route on the UntungLab licence server issues a UL- code
- Free plan: 10 products, no UntungLab link
- Limits block adding only; data is never deleted

Done when: Live RM1 purchase issues the right rights

Phase 9 · QA and V1 launch

Launch V1 · Size M · Needs 1 to 8

Launch the counter POS, about 1 to 15 Nov 2026.

- Real-phone checklist on iPhone and Android, QR scan phone to phone
- Privacy policy and terms (PDPA, meaning of "lifetime")
- Sales page, production keys, early-bird slots set to 15
- Mamu signs off every V1 phase

Done when: Mamu signs off V1 launch

Phase 10 · Batch Selling + Prep List

JualanLab V1.1 · Size M · Needs 6, 2

Sell by batch with quotas, and plan what to cook.

- Batch: pickup date, order cut-off, quota per menu shared by counter and store
- Items close by themselves when the quota runs out
- Prep List per batch and packing list per customer
- Send to UntungLab: batch link into Plan a Batch

Done when: A batch sells out and its quantities arrive in UntungLab

Phase 11 · Online store

Store V1.1 · Size L · Needs 3, 10

Customers order from the seller's own store page.

- Store page at /k/shop-name, sold-out switch, opening hours
- Checkout: name, phone, pickup or delivery (flat fee), time slot, notes
- Pay at pickup or manual QR on every plan
- Order inbox (New, Preparing, Ready, Done, Cancelled), email alerts, privacy notice

Done when: A customer order arrives and appears in Sales Today

Phase 12 · Kedai Plus

Store V1.1 · Size M · Needs 11

Paid store tier with online payment on the seller's own account.

- Seller ToyYibPay or Billplz keys stored encrypted on the server
- Every payment callback checked twice (as UntungLab D-64)
- RM19.90/month or RM199/year, prepaid, 14-day trial, renewal reminder
- When it lapses: store goes back to the Free level, data kept

Done when: Real RM1 payment through a seller test account

Phase 13 · QA and V1.1 launch

Launch V1.1 · Size S · Needs 10 to 12

Release the online store to existing and new users.

- Real-phone checklist for the store and checkout as a customer
- Store terms and privacy notice updated
- Kedai Plus on the sales page and inside the app
- Mamu signs off every V1.1 phase

Done when: Mamu signs off V1.1 launch

After V1.1

When	Feature	What it does
Later	Price Test	Compare sales and profit before and after a price change from UntungLab.
Later	Menu Map	Each menu placed on popularity and profit, with one suggested action per group.
Later	Profit Target	Monthly profit goal with progress and a "sell about 40 more" estimate.
Later, subscription	Ask the Lab (AI agent)	Questions in BM, captions for a batch, weekly summary. Paid add-on.

Prices locked on 9 Oct

Plan	Release	Price	Includes
Free	V1	RM0	10 products, counter and Bazaar Mode. No UntungLab link.
POS (one-time)	V1	RM49 · early bird RM39 (first 15) · UntungLab users RM29	Unlimited products, UntungLab link both ways.
Bundle JualanLab + UntungLab	V1	RM75 (new users)	Both apps; cheaper than buying them one after the other (RM78).
Kedai Plus (needs POS)	V1.1	RM19.90/month or RM199/year · 14-day trial	Online payment via ToyyibPay or Billplz, delivery, unlimited store items.
